

Building & Safety Division Bulletin

2016 California Building Code Updates and Production Home Permit Batch Submittals

On January 1, 2017 the City of Rancho Cordova will begin enforcing the new 2016 California Building Codes, as mandated by State law.

All Master Plans that are currently submitted will have to be brought up to the standards of the 2016 California Building Codes before a permit can be issued.

All production home batches based on Master Plans currently submitted must be processed prior to December 31, 2016. The permits must be issued by February 1, 2017. Any permits not issued by February 1st will be returned to the applicant, and will need to be updated to the new code provisions, and resubmitted.

Any permits submitted after December 31, 2016 must have Master Plans updated to the new 2016 California Building Codes.

Any questions can be directed to Stacey Rappleye, Building Permit Technician II or Joe Cuffe, Interim Building Official, at (916) 851-8760.
