

Miscellaneous Plumbing, Mechanical, or Electrical Permit Fees Based on Valuation

The fees provided are for estimation purposes only, and are not intended to be a final total of fees due for a permit. Fees may need to be adjusted due to project specifics, fee changes, or differences in building permit valuations.

Permit fees are based on the contract value of the project, and the number of “disciplines” (plumbing, mechanical, or electrical) that are required to complete the project. Contract value, or “building permit valuation”, is rounded up to the next multiple of \$1,000. Fees are rounded to the nearest whole dollar.

If the permit requires only one discipline (such as a water heater replacement), find the contract value in the left column, and the fee is in the column labeled “One Discipline”. For permits where two disciplines may be required (such as an HVAC change-out), find the contract value in the left column, and the fee will be in the column for “Two Disciplines”, which is a combination of the main fee and an extra \$25. For three disciplines, find the contract value in the left column, and the fee will be in the column “Three Disciplines” which is a combination of the main fee and an added \$50 for the next two disciplines.

Total Valuation	(Number of Permit Disciplines)
