

Recycling

Clean Material That Can Be Recycled

PAPER

CARDBOARD

PLASTICS

METALS

GLASS

What is "Clean"?

A good rule-of-thumb:
90% container, 10% food.

Give containers a quick rinse
to clean them.

NOTE: If food or liquid has stained
paper or cardboard, toss it in the
organics bin.

Landfill

Trash - Material That Will Not Be Recovered and Is Buried In the Landfill Instead

DIRTY RECYCLABLES

STRETCHY PLASTIC, WRAPPERS & UTENSILS

CUPS

Landfill 101

Recyclable containers with **10%+ food or liquid** are considered dirty.

Stretchy plastic is at the end of its usable life.

Cups usually have a wax lining.

All of these go in the landfill.
